An ordered launch method may be used.

If this method is used on the first day, the order will be according to the WPRS. The following days, the competition ranking will be used.

In both cases, the top 5 male pilots and the top 3 female pilots will have the right to enter the takeoff area whenever they want.

19 - RETAKE-OFF

A competitor will be allowed one take-off.

A failed take-off attempts or a safety problem arising immediately after take-off which results in a landing will not count as one take-off.

The pilot must report to the Take-off Marshall before a second launch.

It is allowed one retake off, but transportation from landing to second attempt will be in pilots arrangement.

20 - FLYING THE TASK

The take-off window will be open for at least 80 minutes.

Cylinders will be used as start sector. The start cylinders radius will be shown on the task board. All turn-points will be 400m radius cylinders around the GPS coordinates supplied by the organizers, or greater which is related to task committee decision.

For scoring, the CIVL GAP 2021 formula will be used in combination with Real Leading Points. Scoring formula parameters are:

- UTC offset: +2:00 h
- Minimum distance: 5 km
- Nominal distance: 50 km
- Nominal time: 1.20 h
- Nominal pilots in goal: 20 %

- FTV factor: 25 %

- RLP minimum LC: 25 %
- RLP black radius: 300 m
- RLP black angle: 30 °
- RLP gray radius: 3000 m
- RLP gray angle: 60 °
- Sphere: 250m
- Distance tolerance: 0.1 %
- Distance calculation method: WGS-84

Other settings will follow the default FAI CIVL GAP 2021 for paragliding.

The above parameters are subject of change before 1st task of competition.

Scoring a stopped task. A task which has been stopped but not cancelled shall be scored if at least 1 hour have elapsed since the first valid start is taken by a competing pilot or at least 1 pilot has achieved goal. Pilots will be scored up to the point in time when the task was stopped, less a specified "score back" time; this score back time is equal to the time between start gate windows or a minimum of 5 minutes in the case of a race task and will be applied to all pilots whether in goal or not. Pilots in the air who have been notified that the task has been stopped are requested to make "big ears" to indicate to other pilots that the task has been stopped. Pilots who do this when the task has not been stopped or when there are no other safety reasons (cloud suck, etc.) will be penalized at the meet director's discretion. Each individual competitor is the best judge of what constitutes safe conditions for that competitor. Each pilot is always completely responsible for his/her own safety.

A pilot who lands (or limits his flight) to assist another pilot in distress shall be scored for the day This score shall be the average day-weighted of what he scored in the previous rounds, or the average pilot score if this happens on the first task. However, as the meet progresses that score will change to take into account his average day-weighted scores of the whole meet so the score will be adjusted after each task. The competition director may also award extra points.

- 1st offense - 100 points.
- 2nd offense - 500 points.
